

# NATUR STEIN

## FARBKARTE 2019

Hartgesteine wie Granite, Gabbros, Gneise, Migmatite oder Quarzite zeichnen sich durch ihre hohe Festigkeit und bei den meisten dieser Hartgesteine durch besondere Säurebeständigkeit aus. Durch diese einmaligen, technischen Eigenschaften sind sie sehr vielseitig verwendbar. Sei es für Arbeitsplatten, Bodenbeläge im Innen- und Aussenbereich, Wandbeläge, Cheminéeabdeckungen oder Tische. Zudem bieten sie eine abwechslungsreiche Farbpalette in weisslichen, schwärzlichen, gelblichen, rötlichen oder bläulichen Tönen sowie verschiedene Gestaltungen wie die gerichtete/gezeichnete Struktur bei Migmatiten und Quarziten.
